

KeyMission 80

En Procedure for Pairing for the First Time (for Android™ Users)

Here, pairing refers to the setting used to connect the camera and smartphone or tablet (below, "smart device") through Bluetooth.

Parts of the Camera

Before Pairing

Camera

- Insert a microSD memory card with sufficient free space into the camera.
- Check that the battery is sufficiently charged so that the camera does not turn off during the procedure.

The camera cannot be charged when it is set in the camera holder.

- To turn off the camera, press the **MENU** (menu) button and **⏻** (turn off).

Smart device

- Two types of apps are available: "SnapBridge" and "SnapBridge 360/170". Use "SnapBridge" when pairing with this camera.
- **Do not pair from the Bluetooth setting screen of the smart device.**

Pairing Procedure

- 1 Check that the camera is off (the screen is off).
- 2 Enable Bluetooth and Wi-Fi® on the smart device.
 - **Do not pair from the Bluetooth setting screen of the smart device.**
- 3 Install the SnapBridge app.
- 4 Press the shutter-release button or the **MENU** (menu) button to turn on the camera.
 - On the language selection dialog, select a language by tapping.
- 5 Scroll through the screen, tap **Set**, scroll through the next screen, and then tap **Next**.
 - The camera enters pairing standby mode.

☒ If You Tap Later

You can pair later by performing the following operation.

MENU button → **⚙️** setup menu → **Camera settings** → scroll through the screen, then **Network menu** → **Connect to smart device**

- 6 Scroll through the screen on the camera and when the screen shown on the right is displayed, launch the SnapBridge app on the smart device.

✓ **If You Are Using N NFC**

Before tapping **Next** in Step 5, touch the NFC antenna of the smart device to the **N** (N-Mark) on the camera. The SnapBridge app on the smart device launches, and when **Camera name acquired. Connect?** is displayed on the screen, select **OK**. Proceed to Step 8.

- Enable the NFC setting on the smart device in advance.
- After installing the SnapBridge app, close all apps that use NFC (including the SnapBridge app). Pairing may fail if apps that use NFC are running.

- 7 When the screen shown on the right is displayed on the smart device, tap the camera name.

- 8 Check the authentication code.

- Confirm that the camera and smart device display the same authentication code.
- Perform the following operations on the camera and smart device at the same time.
 - On the camera, tap **OK**.
 - On the smart device, tap **Pairing** (the name of the button varies with the smart device).

- 9 Follow the on-screen instructions to complete the pairing process.

- Camera: If pairing is successful, the screen shown on the right is displayed. Tap **Next**, and then follow the on-screen instructions.
- Smart device: Follow the on-screen instructions.

When You Cannot Pair

Perform the following and then pair again by proceeding to "Pairing Procedure".

- Press the **MENU** (menu) button on the camera, and then tap ① (turn off) to turn off the camera.
- Close the SnapBridge app.

To Learn More About Using the SnapBridge App

See the online help (tap **Other** → **Info/settings** → **Instructions** in the app).
